Mini Handsfree Wi-Fi

THE SMART DOOR ENTRY MONITOR WITH FACIAL RECOGNITION AND VOICE COMMANDS

Comelit
Passion. Technology. Design.

WORKS WITH alexa

works with the Google Assistant

INSTANT CONNECTION WITH YOUR HOME.

Mini Handsfree Wi-Fi is the revolutionary **wireless** door entry monitor with a unique and original style, incorporating the most hi-tech materials, simple lines, clean shapes. It has a compact Compact dimensions frame a 4.3" 16/9 colour screen with 480x272 resolution.

It connects easily to your home router, replacing your old system without any further changes required to your Comelit system.

This allows you to be immediately connected with your home **wherever you are** and to access all the benefits of Wi-Fi connectivity such as **managing video door phone calls from your smartphone**, opening doors and gates **also automatically with facial recognition, controlling your video door phone with voice** thanks to the integration with the voice assistants, as well as activating all the functions connected to the 2-wire system of the home or condominium.

WITH
YOUR VOICE

The integration with Amazon Alexa, available for free on Mini Wi-Fi, is the incredible innovation that led to the birth of the **first voice-activated video door entry monitor**, which can also be activated remotely.

The connection with Alexa allows you to receive the call notification on a smart speaker and open the gate without even getting up from the sofa. In addition, Alexa will notify us that we have guests: **«Emma has arrived»**; At this point you just have to give the command: **«Alexa, open the gate»**.

360 degree integration that allows you **to activate door and gate opening as well as external lights**, as long as they are connected to the Comelit 2-wire video entry system. A novelty feature that Comelit offers its users completely free of charge, already available on all monitors installed and connected to the Internet.

"Alexa, open the gate"

"Emma has arrived"

Note: with Google Assistant some features may vary. Contact your Comelit contact for more information.

ONE LOOK
IS ENOUGH

FACE
RECOGNITION

Lock-release • Ouvre-porte • Deurslotbediening • Türöffner • Abrepuertas • Abertura da porta • Apriporta •

We know well that **with one look** it is possible to unlock a phone, but what if we could also **open the door?**

Comelit exploits the potential of the Cloud and introduces the **new function of facial recognition**, an intuitive and useful way to manage access to your house through the video entry system.

During each call, the external unit **detects the face of whoever has rang the bell**, just swipe on the face and **add it to the face recognition name directory and from the next call the person will be able to use the function.**
From the APP, like the monitor, it will be possible to add new users, enable or disable each of them and the recognition function itself.

THE
FUNCTION!**

ANSWER FROM ANYWHERE

With its advanced functions, **the Comelit APP** gives you the option of keeping your home under control, even when you are not there. You should no longer worry that someone will not be able to reach you when you are out: every time someone rings your bell **the call will be forwarded directly to your smartphone.**
Overcome distance with the Comelit APP: you will be able to answer in real time, wherever you are.

Comelit App

THE MAIN FUNCTIONS

- *Receiving calls from the outdoor entrance panel, wherever you are*

- *Reviewing recordings from the cameras connected to your system (including the entrance panel device)*

- *Reviewing video messages recorded by visitors in the event of missed calls*

- *Calling the indoor devices connected to your system (door-entry phones and door entry monitors)*

- *Opening gates and doors; switching on lights*

- *The APP uses PUSH notifications, which means that it is only activated when a call is received, thus saving energy and data.*

And much more...

INTUITIVE, SIMPLE AND VERSATILE

Replacing an old door entry monitor to benefit from all the advantages offered by Wi-Fi technology is no longer problematic: **MINI WiFi s compatible with all types of Comelit 2-wire** colour video entry phone system and therefore can simply **replace your existing door entry monitor without having to resort to installing additional power supply units.**
Developed with a choice of different installation solutions to meet all requirements: there are kits for single-family and two-family residences or for apartment block door entry systems.

ADVANTAGES FOR THE INSTALLER

- *Installation is simple and immediate and, in case of replacement, no additional masonry works or the purchase of additional power supplies are required. It is also an excellent opportunity to propose the replacement of old Comelit video door entry monitors.*
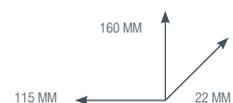

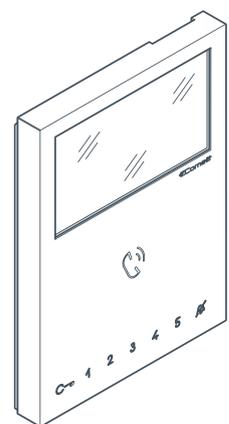

Clack. Done.

In addition, Mini Wi-Fi is equipped with a **«video answering service»** which signals the user via notifications on the monitor an actions that occurred while you were out, informing you if someone has called during the day.

TECHNICAL SPECIFICATIONS

- 4.3" 16:9 monitor connected with integrated Wi-Fi

- It replaces the old 2-wire door entry monitor without requiring additional wiring

- Receive and answer calls from video door entry on smartphone / tablet

- Outputs connected to the external unit (lights, gates...) can be activated directly from the app

- Face recognition function with automatic door opening

- Management of the video door entry system with voice command

- Commands with "Sensitive touch" technology and LED backlighting

- Wall-mounted and desk base installation

- Version for SBTOP 2-wire system

- Dimensions: 115 x 160 x 22 mm

- Contrast, brightness and ringtone volume adjustment and privacy control

- Available in white version

Size (inches) (")	4,3
Aspect Ratio	16:9
Resolution (pixels)	480x272
OSD menu	Yes
AUDIO FEATURES	
Type	Hands-free
Magnetic induction function	Yes (Art. 6741W/BM)
Microphone	6mm (Ø), Omnidirectional
Loudspeaker	36mm (Ø), 40 Ohm, 1W
ELECTRICAL CHARACTERISTICS	
Type of power supply	Power supply from video door entry bus
Supply voltage	22÷34 VDC (Bus)
Absorption in stand-by (W)	0,1
Stand-by absorption in kit mode (W)	1,9
Maximum absorption (W)	8,1
HARDWARE FEATURES	
Type of buttons	Capacitive
Service buttons	Lock-release, Answer, Silent (Privacy), Menu, Messages, Door open
N° of programmable buttons for additional functions	4
Clamps	L L CFP1 CFP2
Removable terminals	Yes

SETTINGS	
Loudspeaker volume	Yes
Ringtone volume	Yes
Screen brightness	Yes
NETWORK AND COMMUNICATION PROTOCOLS	
Type of Wi-Fi connection	IEEE 802.11 b/g/n, 2.4 Ghz, 13 channels
Encryption and authentication method supported	OPEN WPA-PSK networks, TKIP WPA2-PSK, AES WEP 64 bits (5-digit ASCII or 10 hexadecimal codes), WEP 128 bits (13-digit ASCII or 26 hexadecimal codes)
IP address assignment	DHCP
IoT connection to Comelit Cloud	Yes
Firmware update via Comelit Cloud	Yes
ENVIRONMENTAL AND COMPLIANCE FEATURES	
IP protection degree	IP30
Operating temperature (°C)	5 ÷ 40
Operating humidity (RH max - %) (%)	25 ÷ 75
Environmental class	I
Compliance and Certifications	RoHS II - 2011/65/UE (EN 50581:2012), RED 2014/53/UE (EN 60950-1:2006+A11:2009+A1:2010+A12:2011, +A2:2013, EN 62311:2008, EN 61000-6-1:2007, EN 61000-6-3:2007 + A1:2011, ETSI EN 301 489-1 V2.2.0, ETSI EN 301 489-17 V3.2.0, ETSI EN 300 328 V2.1.1)
MAIN FUNCTIONS	
Comapatibility with Comelit App	Yes
Facial recognition	Yes
Compatible with voice assistants	Yes
Door opener	Yes
