ultra

A NEW STEP FORWARD

DIGITAL CALLS

ultra

Ultra is a modular entrance panel, available with **2-wire or ViP** technology, which adapts to all installation requirements. The modular nature of Ultra allows the user to create an external unit to reflect his/her own image, that is capable of adapting to **all requirements**, from individual homes to large residential complexes. The **Touchscreen**, **Keypad** (which can be used to make calls as well as enter classic lock-release codes) and **Digital Directory** versions provide ideal solutions for easy navigation of complexes encompassing hundreds of apartments. **100% Italian**-designed, simple and modern, Ultra is today's **entrance panel of the future**: one of the products that best expresses **Comelit's attitude**, encompassing constant research, pushing beyond our own limits and striving for constant improvement.

WIDE-ANGLE CAMERA
up to 160x90° and 2 MP resolution, for perfect vision

IP65
for the utmost resistance to atmospheric agents, chemical corrosion and UV rays

VIP OR 2-WIRE
depending on your requirements

IK08
to cushion any kind of impact

ENERGY SAVING
to safeguard our environment

### FLUSH- OR SURFACE-MOUNTED
to fully adapt to site aesthetics

BLUETOOTH PROGRAMMING
via app or computer

DUAL SPEAKER
for improved audio performance

3 CALL MODES

With Ultra, we really have thought of everything! Three call modes or layouts designed for every requirement, programmed directly from the entrance panel to find the solution most suited to the site.

1 Button for opening the screen used to enter the personal code

THE COMPACT CHOICE

Ultra is also available in a **Digital Directory** version with 3.5'' colour display and **backlit mechanical buttons**. It can store up to 1500 names, with the option of **customising buttons** to make searching quicker or to categorise professionals such as doctors or lawyers.
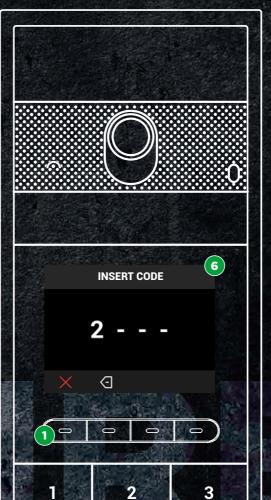

The Digital Directory module works **alone and in conjunction with other modules**, such as the Number Keypad (which can be used to call the desired internal unit and to open the door using a secret code) or the modules used to read keys and proximity cards.
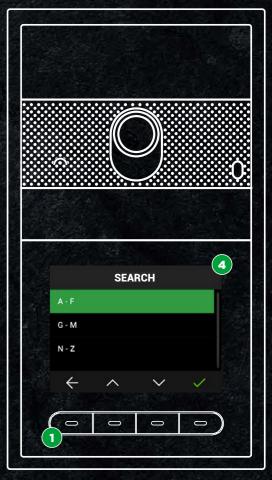

1. Physical buttons
2. Scrolling directory with buttons
3. Call in progress screen
4. Search users by alphabetic order
5. Search by building
6. Lock-release code*
7. Opening with proximity reader**

*only available if used in conjunction with keypad
**only available if used in conjunction with modules with reader

Welcome

THE SMARTEST KEYPAD THERE'S EVER BEEN

The innovative module with **number keypad** can be used to enter classic **lock-release codes** and to **make calls** using a code, thereby minimising the number of modules required and consequently limiting costs.

It works in stand-alone mode for the opening of access points, whether paired with just the audio or audio-video module, or with other modules such as the digital directory or proximity reader modules, or in addition to the classic button keypad.
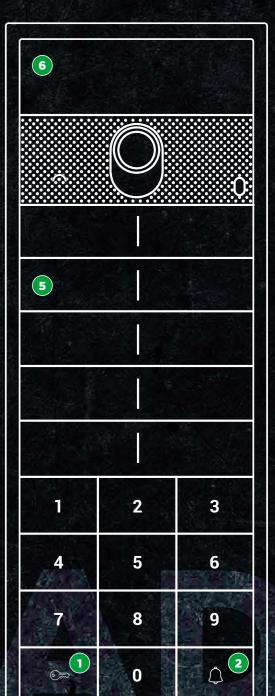

1. Button for lock-release function
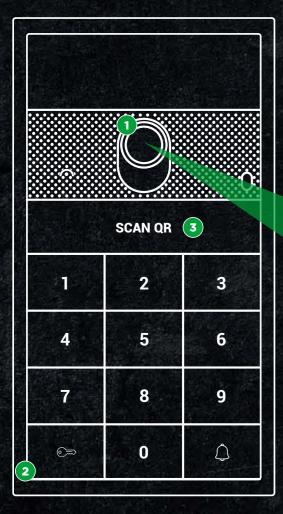

2. Button for call function

3. Proximity reader

4. Digital directory

5. Classic buttons

6. Audio/Video module

Available on the App Store

ANDROID APP ON Google play

1 The Audio/Video module can read the QR code

2 The Keypad (like the touchscreen module) can be used to enter the temporary lock-release code

3 Button that activates the QR code scanner

TEMPORARY CODES

Are you waiting for guests to arrive, and you don't want them ringing the doorbell one after another? Are you away and unable to answer the dog sitter? Generate temporary access codes* for your visitors!
These codes may be classic numeric codes, which can be entered using the touchscreen entrance panel or the keypad, or QR codes which can be scanned directly by the camera on the audio/video module.

They may be enabled for recurring access, or limited to a specific time window, such as the guests of a B&B, for example.

*available only with MUG o 1456S
