Solutions that Secure: Comelit-PAC Security & Fire Systems

Comelit-PAC delivers premium solutions to enhance the security and safety of any property. Our systems incorporate cutting-edge technology, including advanced cameras and fire safety solutions, providing you with comprehensive control and protection. Designed for seamless integration, our solutions adapt to residential, commercial, and industrial environments, ensuring peace of mind.

SINCE 1956, COMELIT HAS BEEN DEDICATED TO TURNING OUR VISION OF TOTAL SECURITY INTO A REALITY.

A Legacy of Leadership and Innovation

For nearly 70 years, we have been recognised internationally as a leader in door entry systems, celebrated for the quality, innovation, reliability, and ease of installation of our products.

Over time, we have expanded our expertise to encompass a full range of security solutions, including access control, fire safety systems, video surveillance, home automation and intruder alarms.

Our growth has been strengthened by strategic acquisitions, which, alongside our research and development centres in Rovetta, Bergamo, Tunis, and Paris, have established specialised hubs of expertise. These include PAC in the UK, Teletek Electronics in Bulgaria, Blueprint in Italy, and, most recently, Ingenium in Spain.

Today, our global footprint extends far beyond our Rovetta headquarters, with 9 international subsidiaries, 8 research centres, over 1,000 employees, and a presence in more than 90 countries. This robust structure enables us to deliver greater value to our partners and end-users alike, fulfilling our commitment to creating a safer world every day.

> " The history of Comelit is shaped by the trust and confidence of those who have chosen us for their projects and achievements.

2-wire Door Entry Systems

Key features:

- **2-Wire Connection:** Simplebus supports both retrofitting in existing buildings and new projects.
- **Versatile Wiring:** Compatible with various cable types; adaptable to building layouts.
- **Expandable System:** Standard capacity of 240 users, expandable up to 120,000 users, with unlimited entrance panels.
- **Audio to Video Conversion:** Upgrades existing audio systems to video intercoms without replacing wiring.

Benefits for installers:

- **Time and Cost Savings:** Quick installations with DIP switch-based call assignments.
- **Reliable Design:** Polarity reversal protection and up to 1,000m range (Simplebus TOP).
- **Custom Options:** Bespoke entrance panels simplify replacements; integration with CCTV is available.

Benefits for Users:

- **Customisable Setup:** Choose from various entrance panels and handsets/monitors.
- **Advanced Connectivity:** Integrates with analogue CCTV cameras; connects to smartphones via app or WiFi monitor (up to 15 devices).
- **Enhanced Security:** Features inter-device communication and face recognition technology.

Building Kit features:

- **2-Wire System:** Fully compatible with both existing and new cabling.
- **Optimized for Small to Medium Projects:** Reduces costs and installation time.
- **Wide Compatibility:** Works with the entire Simplebus monitor range, as well as Ultra, Switch, and Bespoke panels.
- **Scalable Kits:** Supports 1 to 14 users, expandable up to 100 users depending on distances.
- **WiFi Monitors:** Available within the Building Kit range for added flexibility.

ViP Door Entry Systems

Key features:

- **IP-Based System:** ViP (Video Internet Protocol) is a server-free, fully isolated video intercom system.
- **Flexible Installation:** Works with existing networks or Comelit switches, supporting auto-IP, DHCP, or static IP configurations.
- **PoE Powered:** All devices are powered via the network line.
- **Centralised Management:** Programming and configuration are done through the Comelit ViP-Manager software with remote diagnostics.

Integration:

- **Video Surveillance Compatibility:** Integrates with Comelit and 3rd-party Video Surveillance cameras via RTSP stream.
- **Smart Control:** Manage relays for lights, gates, etc., via speed buttons or telephone book.
- **Home Automation:** Compatible with 3rd-party home automation systems.

Scalability:

- **Unlimited Devices:** Supports door stations, internal call stations, and relays across multiple buildings.
- **Simultaneous Calling:** Handles multiple calls without busy signals.
- **Mobile Connectivity:** Connect up to 15 smartphones or tablets via gateway or WiFi monitor.
- **Unit Capacity:** Each residence can support up to 15 indoor call stations.

Benefits:

- **User-Friendly:** Internal calls via speed buttons or contact list.
- **Scalable and Future-Proof:** Easy to add or update products and systems.
- **Pre-Installation Efficiency:** Barcode scanner option for off-site programming.
- **Enhanced Communication:** Send images or messages from concierge to users.

PAC Access Control

The pioneers of Proximity Access Control.

Our market leading PAC access control is built on a foundation of continuous innovation in security systems that are scalable, easy to install and maintain.

Our offering includes readers, controllers, credentials and management solutions, which can be seamlessly integrated with door entry, video surveillance, time and attendance, intruder and fire safety systems.

GETTING STARTED WITH PAC...
JUST GOT A WHOLE LOT EASIER.

Our 511 DCi Starter Kits offer an affordable and user-friendly solution that can significantly reduce installation time.

Each kit includes:
• PAC 511 DCi 1 Door Controller complete with lockable metal case, tamper switch and 3 Amp PSU.
• 1 x PAC HF Mullion Reader
•10x OPS Fobs
• Admin Reader - Multi-tech, USB cable
• Quick Start Guide

MANAGEMENT SOFTWARE

Our software integrates seamlessly with the PAC controllers to provide a powerful configuration and in-life proactive management platform. Designed to support a variety of applications, from small, single block premises to a global network of offices or multi-site residential estates, PAC software delivers integrated security solutions with the ability to add a range of additional services (CCTV monitoring, lift call, etc) for a seamless integration.

Fully featured management software that supports:

• Configuration and management of the PAC system components.

• Keyholder configuration for easy credential management.

• Expands into full building control, including: Lift Control, CCTV Integration, Alarm monitoring and management, Event to action engine, enriched reporting, full operator control centre application, 3rd party equipment control, building and safety system inputs

CONTROLLERS

With unbeatable reliability and flexibility, our extensive range delivers a multitude of solutions to suit a variety of applications and environments. Key Features:

• Multiple options from standalone to networked 1 and 2 door controllers

• Scalable from 1-20,000 doors

• Scalable to support up to 75,000 unique ID Devices

• Easy to install with integrated power supply options

• Easy expansion with Input/Output Controllers for a large range of building/lift control features

READERS

Truly versatile, scalable and backward compatible for ease of upgrading, the PAC readers provide an unparalleled standard of security and robustness in a variety of applications. Key Features:

• Reader options to support a variety of PAC and Wiegand ID Devices

• Multi-factor authentication option readers

• New Architect Readers that support smartphone Mobile ID's

• Biometric Readers for fingerprint validation

CREDENTIALS

PAC credentials come in a range of forms (token/fob , card or mobile) and technology types that enable a variety of user options. Key Features:

• PAC OPS™ our industry leading anticlone technology

• Multiple technology formats to work with existing and new access control systems

• Credentials and Mobile ID formats

• High security (non-cloneable) credentials available

• All come with a lifetime warranty against electronic failure

Discover more about our access control range here: **www.pacgdx.com**

PAC Access Control

SOLUTIONS FOR VARIOUS MARKETS

DESIGNED TO PROVIDE UNBEATABLE RELIABILITY AND FUNCTIONALITY

With over 60 years' experience in designing and manufacturing secure access control products and integrated security solutions, PAC provides a well-established range that delivers flexible integrated security solutions for the commercial and residential market sectors.

INTELLIGENT ACCESS CONTROL

Fully featured, always on and flexible security.
Enhanced access control that adds proactive monitoring of who goes where and when to the in-built security offered by PAC.

EXPANDABLE SYSTEM

Designed to support cost-effective expansion.
Built to interoperate either at a hardware level with other building and safety control systems; or at a software level through our powerful API interface.

END-TO-END SECURITY

Secure by design.
PAC supports high security non-hackable, non-cloneable ID devices through its own encrypted PAC OPS solution. Available in Card, Token and Mobile ID versions.

INTEGRATED SECURITY SOLUTION

One solution.
The PAC solution extends into an integrated security solution that can incorporate alarm monitoring, CCTV Surveillance, Lift Control, Fire safety and video door entry. Providing a multi-layer security solution that is easy to manage via a centralised hub, providing easy monitoring to secure your business.

New to the PAC Portfolio

PAC OPS™ credentials

We have standardised our fobs with an increased technology layer for spec and improved reader range. Our Fob technology works from LF all they way through to our PAC OPS™

Our Fobs enable a variety of user options and suit different access control deployments throughout the commercial, residential, education, health, and public sectors. OPS™ fobs are compatible with all PAC HF Readers, PAC MT Readers and Architect Readers. By presenting the fob to a reader, the access permissions will be instantly verified, and access will be granted or denied as applicable.

- **Durable OPS™ fob with a PAC logo**
- **Anti-clone - PAC's most secure fob offering**
- **Designed to be attached to a keyring or lanyard**
- **Lightweight and trouble-free to carry around**
- **Option to add coloured clips to be able to distinguish between different users, available clip colour options: White, Grey, Black, Turquoise, Green, Yellow, Red, Maroon**
- **Available in packs of 10 for quick and easy purchase**

Access Central™ Mini Cube

- **Industrial machine**
- **Designed to run 24/7**
- **No need to install software - already pre-configured**
- **Supports up to 20 doors, 4 CCTV feeds and 1000 keyholders**
- **Supports all the advanced Access Control features such as Guard Tour**
- **Ideal for small to medium enterprise installations**

Access Central™ SE Cube

- **Improved user experience**
- **Industrial machine**
- **Designed to run 24/7**
- **No need to install software - already pre-configured**
- **Supports up to 250 doors and 20,000 keyholders**
- **Supports all the advanced Access Control features you would expect for mid-range installation**
- **Ideal for medium to large commercial enterprises installations before our pro software is required.**

Commited to Fire Safety

With a comprehensive product portfolio and stock available for next-day delivery, we support high-quality installations in full compliance with the latest legislation. Led by a dedicated UK fire team, Comelit-PAC provides solutions that cover design support, planning, commissioning support, and configuration.

Our complimentary training programmes, from basic installation to complex networking, are held at state-of-the-art facilities in Manchester and Luton, ensuring customers always receive expert support.

Explore Comelit's fire safety systems, designed to protect people and property. Backed by research and development, our advanced detection and prevention systems deliver maximum reliability and protection. We offer addressable and conventional systems, seamlessly integrating with PAVA, wireless, and IP door entry systems.

All Comelit fire safety systems comply with EN standards, ensuring each device is rigorously tested to deliver outstanding performance in the event of a fire.

Logifire

From small spaces to large-scale projects—whether it's a shopping centre, healthcare facility, manufacturing plant, or airport—LogiFire offers a versatile and flexible solution that adapts to any installation or programming need. Seamlessly integrating with other systems, LogiFire is your go-to choice.

As the leading addressable system, LogiFire features expandable control panels with 1 to 8 loops, a large 7" touchscreen with an intuitive interface, backward compatibility, and the ability to network up to 64 panels. Explore the many advanced features LogiFire has to offer.

8 POINT FIRE PLEDGE

1 State of the art training facilities, available in Luton and Manchester

2 UK stock including addressable panels available for next day delivery

3 UK based technical support available remotely and on-site

4 Sales and technical support from initial design stage through to project completion

5 Next day shipping five days a week

6 Extensive product roadmap with continuous phased product launches through 2025 and beyond

7 Operating with a dedicated UK fire sales and technical team with a wealth of fire industry knowledge

8 Guaranteed compliance to latest standards for all fire safety systems

Logivox

PAVA systems are critical for security and effective evacuation management. Through a network of certified loudspeakers, they provide vital alerts in case of danger.
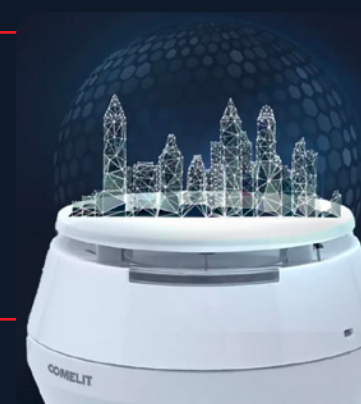

With our PAVA systems, you can ensure that people are immediately warned of potential threats with a clear and distinct acoustic signal, enabling them to safely access escape routes. Your customers will always be protected and well-informed during an emergency.

For a fully integrated solution, choose our new LOGIVOX public address and voice alarm systems. These panels are easy to install, simple to program, and seamlessly integrate with LOGIFIRE systems, offering a comprehensive approach to evacuation management.

Wireless

Discover the convenience and reliability of wireless fire detection solutions. Designed with advanced technology, these systems offer a communication range of up to 1500m range and a battery life of up to 10 years. Compatible with both addressable and conventional systems, they ensure dependable protection without the need for extensive cabling.

Video surveillance

As a provider of video surveillance systems, we are in the business of offering safety and peace of mind to your customers. By installing cameras and monitoring systems in homes and businesses, we are helping to deter crime and protect people's property.

Comelit video surveillance systems are designed to provide round-the-clock surveillance, giving our customers the ability to keep an eye on their properties at all times. This can be especially useful for businesses, as it allows them to monitor their stores and warehouses, even when they're closed.

Our strong cyber security measures are also an important selling point. As more and more businesses and individuals store sensitive information online, the threat of cyber attacks has become increasingly prevalent.

Comelit offers two product ranges, the NEXT series and the ADVANCE series.
The NEXT series includes high technology products suitable for small and medium-sized systems. While the ADVANCE series offers exceptional standards in Deep Video Analytics (DVA), including functions that can detect people, vehicles, bicycles and motorbikes, counting functions, heat maps, and metadata analysis. It is ideal for medium and large systems and can meet any type of demand.
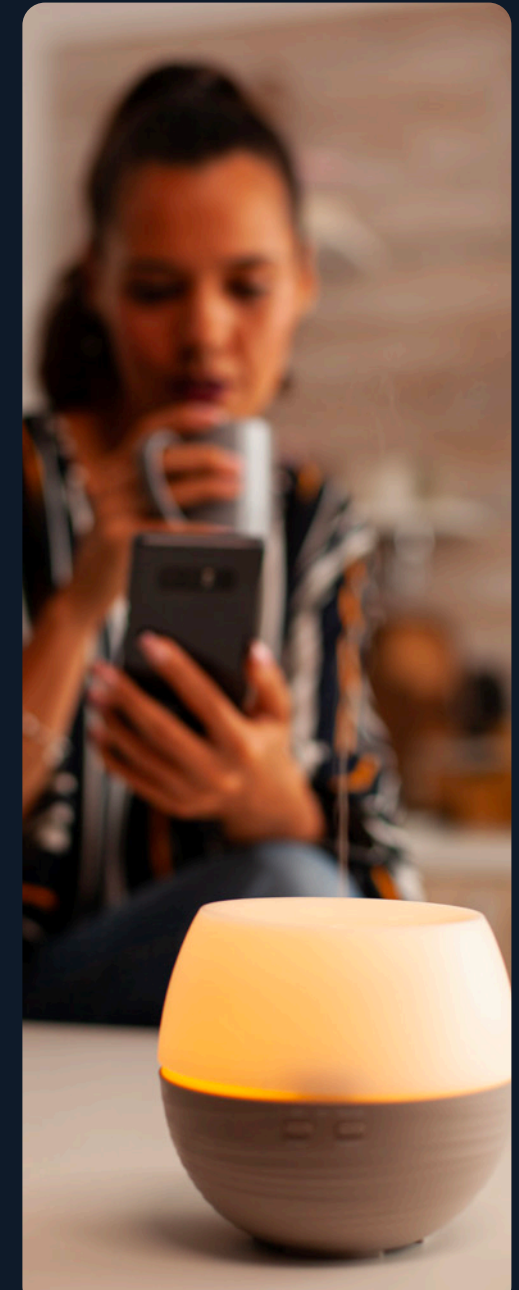

NDAA COMPLIANT

PAG 283-285

Smart Home

Home automation improves the quality of your everyday life, giving you all the wellbeing and security your home can offer. Plus, home automation can also help you cut your energy bills by up to a third. All you need to do is make yourself comfortable.
Comelit research brings you a new way of perceiving and managing living space. The innovative integrated Comelit systems go beyond the traditional concept of home automation: they represent a formula for intelligence that is easier to apply and more pleasurable to use, bringing together functionality, security, financial savings, comfort, visual appeal and environmental concern.

- **Climate control (Temperature, Humidity, Timer)**
- **Light control (ON-OFF, RGB, Dimmer, Dali)**
- **Scenarios creation and activation**
- **Consumption and energy costs monitoring**
- **Irrigation management**
- **Roller blinds and Venetian blinds control**
- **Schedule configuration**
- **Logic rule enabling**
- **Integration with voice assistants**

Comelit App

Answer and open, check on and manage your home from anywhere.

With our mobile app, you can view your visitors, grant temporary access, and enjoy numerous other features:

The **Comelit App** is a powerful tool that let's you manage your Comelit Door Entry, CCTV, Intruder and Home Automation products from your Smartphone or Tablet. With the app, you can control your video intercom, manage your digital access codes, and view your cameras all from one interface. The app is designed for user convenience, allowing you to communicate with visitors, grant access remotely, and monitor your property from anywhere. It also lets you manage your smart home system and intruder alarm, giving you complete control over your home security. Download the Comelit App today and take the first step towards a safer, more convenient future.

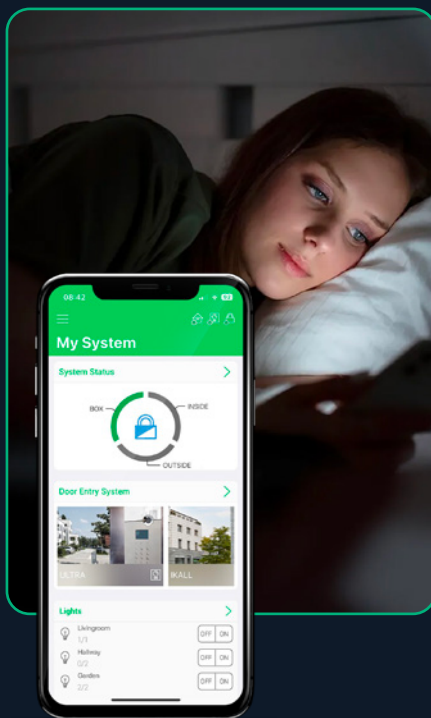

Never miss a call
The convenience of answering video intercom calls anywhere: both at home and away from home.

Security
The Comelit App grants full autonomy in the management of all functions of the Intruder Alarm control panel and allows multiple systems to be managed simultaneously.

Maximum comfort
Developed to ensure home comfort and security in one app. Scenarios, multiple actions, lights, blinds and more.
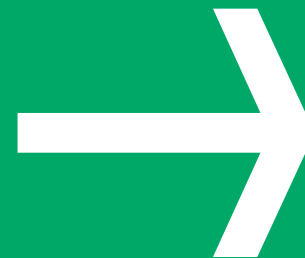

Another layer of security
Manage the entire video surveillance system, switching between cameras easily and viewing different footage simultaneously or individually.
