Since 1956, we have been making history in the door-entry phone and door entry monitor sector and have actively contributed to its **ongoing** development. Over the years, the experience gained in this specific sector when it comes to meeting installation **requirements**, such as simplicity, reliability and multiple functions, has allowed us to grow and make a name for ourselves as an **international benchmark company**.

Our **values** and our business **vision** are the foundation upon which we have developed a well-run, well-structured global organisation, with **10 branch offices**, **6 Research and Development centres**, more than **800 employees** and a commercial presence in **over 90 countries**.

In addition to video door entry systems, we design and build anti-intrusion, video surveillance, home automation, fire protection and access control systems, which makes us a single partner specialising in protecting people and their environment.

With You. Always.

OUR PROMISE, OUR COMMITMENT.

Being close to those who choose Comelit for their customers is our daily commitment. Our commitment is demonstrated by the fact that we are constantly researching and developing new, easy-to-install, high-performance solutions and offering daily advice and assistance on the phone and on site, as well as extremely reliable products and systems of the highest quality, supporting you step by step in your work. With You. Always. Because your success is our success, and your satisfied customers are our satisfied customers.

- Quickly browse through all the technical, application-related and commercial information concerning our products (catalogues, manuals, technical data sheets, etc.).
- Keep up to date with all the news we have for you: promotional offers, online and on-site training courses, services, new products and much more.
- Set up your video door entry systems in just a few steps and save them in your reserved area.
- Request a quote directly from the configurator and browse through all your offers in the dedicated section.
- Request technical and commercial support for designing a system.
- Manage and monitor your connected systems and receive notifications on the status of installed products to receive prompt assistance in case of anomalies.
- Edit the names of the Ultra entrance panel (in the Touch or digital Directory versions) via Bluetooth connection.

MyComelit.

THE APP YOU WON'T BE ABLE TO DO WITHOUT.

Simple, straightforward and customised. Thanks to all the services provided, MyComelit makes work easier for all **industry professionals**: Installers, Draughtsmen, System integrators, Security managers, Building managers and Architects.

Specialised technical consultants

To remain close to its customers in a knowledgeable and effective way, Comelit makes use of a technical and sales staff with experience in fire detection systems, allowing customers to count on reliable representatives capable of identifying the most suitable solutions, supporting them during the installation process and providing a post-sales service.

A technical office dedicated to planning and design

Designing a fire detection system can turn into a complex task, especially if it needs to be integrated with other systems dedicated to protecting the building and keeping it secure. For this reason, Comelit offers its customers the assistance of a dedicated technical department, capable of supporting the customer's own technical department, with the aim of achieving the very best performance levels and using the systems to their full potential.

With You. Always.

Integration and innovation to ensure **safety**.

The Comelit range of fire detection systems provides a complete solution to guarantee the safety of the people and their possessions inside a building, offering an effective response to all professional and prescriptive requirements. The LogiFire range of addressed control panels offers extremely flexible configuration, capable of guaranteeing high performance levels in all application contexts: from small spaces to shopping centres, from healthcare facilities and hospitals to manufacturing premises and from airport hubs to office buildings.

INTEGRATION:

- Voice Evacuation systems
- HORUS system manager
- ViP IP video entry systems
- MODBUS systems
- ESPA systems

Expandable technology, design and connectivity: **LogiFire is a complete evolution.**

LogiFire represents the complete technical and aesthetic evolution of the Comelit range of fire detection control panels.

Designed to adapt to all requirements, the new LogiFire control panels are modular and can be expanded up to 8 loops; they also offer the option of creating systems with 64 interconnected panels in a network. Cloud connection allows the monitoring of all systems, constantly checking their operating status and detecting any faults in order to provide timely intervention.

The design of the sensors is another strength: their elegant and logical lines make them perfect for installation in any environment. This design has also received several prestigious awards: Design Plus (Best of) 2020, German Design Award 2021, Red Dot Award 2021, Good Design Award 2021 and iF Product Design Award 2021.

EVAC LOGIVOX **systems: the** **friendly voice that** **guides you.**

EVAC (Emergency Voice Alarm Communications) voice evacuation systems play a very important role in security and evacuation plan management. Thanks to the availability of different models, which can also be installed in combination with each other, and to the maximum flexibility in programming, the range of LOGIVOX EVAC control panels adapts to all needs in terms of sound diffusion and at the same time allows all types of evacuation to be managed in a correct and structured manner, avoiding crowding or panic situations. Direct communication, via protocol, with the LogiFire series control panels makes it possible to programme the system's automatic actions according to the origin of the alarm and with differentiated delays, guaranteeing the privileged evacuation of the most sensitive areas.

Horus: a single system manager for all systems.

Integration between the fire detection system and other protection systems - such as video surveillance and intruder alarm systems - provides outstanding prevention and keeps the people inside the building safe. The Horus system manager by Comelit is the solution for monitoring all systems using graphic maps from a single workstation, making it significantly easier for security managers to carry out their tasks.

For example, when faced with a fire alert from any device, Horus can enable viewing of the closest camera, for instant event verification. That's not all: the platform can also be used to program automations and custom scenarios based on your own requirements, such as switching on certain lights to assist in evacuating people from the building using a specific route, unlocking exits, inhibiting ventilation or playing a voice message.

LogiFire and Vip: Unity does not create strength, it creates safety.

The integration of the fire detection system and the Comelit IP video entry system means that the safety of a building can always be kept under control.

The video entry system actually uses the 1467 interface to receive information relating to alarm indications and distributes it in a logical and structured manner by apartment, floor or area. Alarm messages are sent directly to the door entry monitor by means of a pop-up and an audible alert and, if an internet connection is available, the user will have the option of receiving notifications relating to the event in progress on their smartphone via the Comelit App.

If there is a porter switchboard in the building, this becomes an instrument for receiving all alarm/fault conditions occurring on the fire alarm control panel.

Your fire detection systems at the click of a mouse!

With MyComelit you can manage and monitor all Comelit **fire detection systems** connected to the **Cloud**. Use is simple: just access the **app or the web platform**, add in the "Sites Management" section all the devices to be supervised and, in the case of complex installations, group them by sites, thus creating a **virtual map** of all the different active installations. At each access, small icons appear on the map that, in addition to identifying the location of the installation, thanks to different colours, allow you to immediately understand if everything is working properly or if there are anomalies or faults related to the operation of the installation. In this case, the app sends a real-time notification or an email to allow you to intervene preventively without creating disruption to your customers, demonstrating professionalism and attention. A **simple and intuitive** but at the same time **flexible and very secure** platform to allow you to manage and monitor Comelit fire detection systems **wherever you are!**

Safety with total peace of mind

Manage your systems and installations with the new platform developed by Comelit, designed to **meet your needs** and give you the **peace of mind** of having everything under control in one place.

Real-time system status display

Check the status of your system **24 hours a day, 7 days a week**. At a glance, you can check the condition of your fire detection systems and connected devices via an **intuitive graphical interface** and dedicated icons.

Remote operations on all systems

Check how the points and zones belonging to the system are programmed, monitor the **contamination status** of sensors to prevent future fault reports, and exclude zones and devices according to **specific requirements**.

Simplified event visualisation

You have **complete traceability** of all events occurring in the system, so that you always have the complete system history under control, even remotely.

Fire detection yes, but also video door entry and alarms

With MyComelit you can also monitor and programme Comelit **IP video door entry** and **alarm systems**. A single platform to manage 3 different systems, both on the same or at different sites

Saving time and resources by sharing

Make the management of your installations and necessary changes quicker and more efficient. You can **share the system with your employees** and give special permissions according to role!

PROFESSIONALS AND SECURITY MANAGERS

A platform and an App created to meet the needs of professional Installers and Security Managers to be able to control their installations, always and remotely. You no longer need to travel to the site for all the inspections!

myCOMELIT

Graphical maps interactive and navigable

The organisation of the systems in **interactive, multilevel graphical maps** allows the visualisation of the created systems, clickable and with different colours according to the **operational status** of each site.

Simple and fast association of the control panels to the Cloud

Associating the fire alarm control panel with the Comelit Cloud via App or Web page, **easier done than said!** Connect the control panel, scan the QR code and associate it with your account. It's done, and all in the time of a coffee!

Available for all operating systems

You can reach the web platform from **any browser** and operating system installed on your PC or Tablet. The **MyComelit** app for smartphones is available for Android and iOS.

Management of maintenance records

Everything always under control. Plan and receive **reminders on scheduled maintenance management**, check the contamination status of sensors and any anomalies in the system to optimise periodic check-ups.

Always one step ahead with email and push notifications

No more unexpected calls on Sundays during the game! MyComelit **sends you a notification on your smartphone and by email** every time there is an intervention to be done, a fault or an event in progress, informing you of the reason and exact location of the problem!

A team of experts always at your disposal!

When you choose Comelit you choose a company whose **daily commitment** is to be there for you, not only in the research and development of new solutions that are easy to install and use, but above all dedicated to the **daily advice and assistance** we offer both by phone and in the field.

COMELIT-PAC IS COMMITTED TO FIRE SAFETY.

Since 1956, Comelit has been making history in the **door-entry** phone and door-entry monitor sector and has actively contributed to its **ongoing** development.

Over the years, we've gained experience and we currently design and build **anti-intrusion**, **video surveillance**, **home automation**, **fire protection** and **access control systems**, which makes us a single partner specialised in protecting people and their environment.

For each of these sectors, our main goal is to meet installation **requirements**, such as simplicity, reliability and having multiple functions: this has allowed us to grow and make a name for ourselves as an **international benchmark company**.

Our **values** and our business **vision** are the foundation upon which we have developed a well-run, well-structured global organisation, with **17 branch offices**

abroad, more than **800 employees** and a commercial presence in **over 90 countries**.

With an all-encompassing product portfolio, and **stock available** for **next day delivery**, we can work with you and support installations of high quality and in full **compliance** with latest legislation.

Led by a dedicated **UK fire team**, Comelit-PAC offers solutions that encompass the design and planning phases and considers requirements for **commissioning and configuration**.

Together with our complimentary **training programmes**, from basic installation to full integration, held in our state-of-the-art facilities in Manchester and Luton, customers can be assured that we are really 'with you always' from a **sales and technical** perspective.

8 POINT FIRE PLEDGE

1 State of the art training facilities, available in Luton and Manchester

2 UK stock including addressable panels available for next day delivery

3 UK based technical support available remotely and on-site

4 Sales and technical support from initial design stage through to project completion

5 Next day shipping five days a week

6 Extensive product roadmap with continuous phased product launches through 2022 and beyond

7 Operating with a dedicated UK fire sales and technical team with a wealth of fire industry knowledge

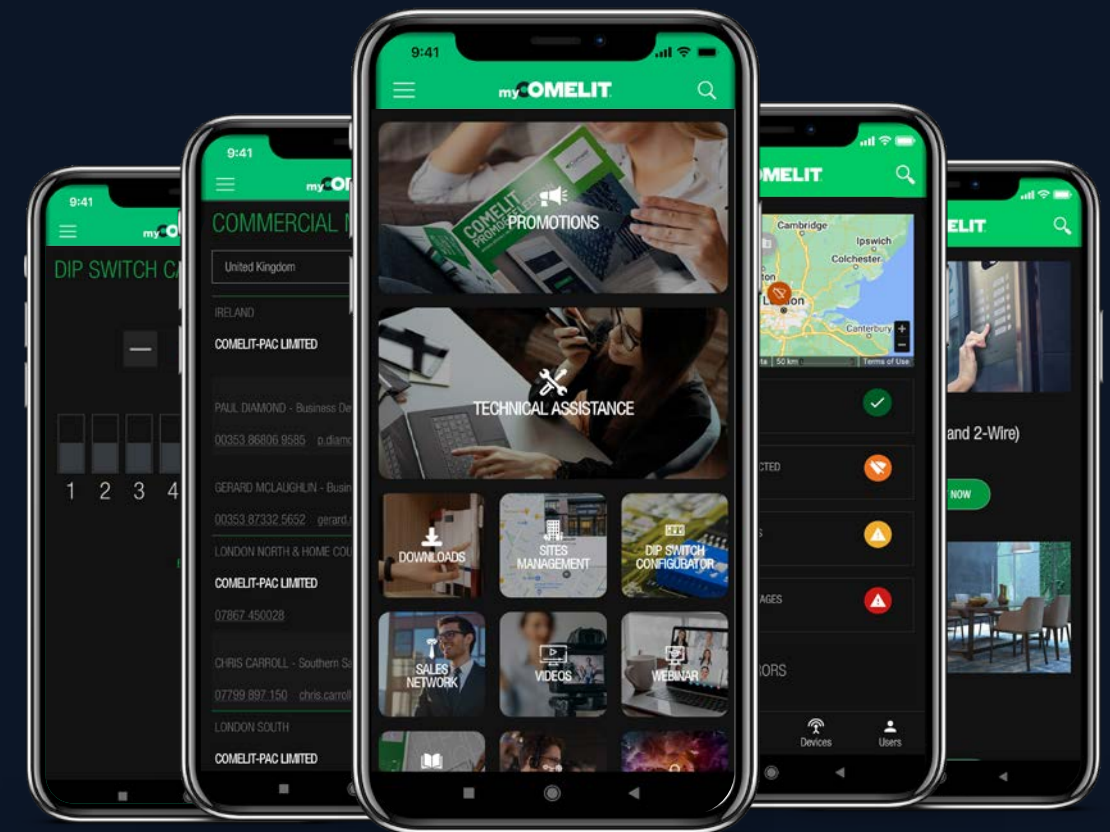

8 Guaranteed compliance to latest standards for all fire safety systems
