COMELIT PAC

LEADING THE WAY IN SECURITY CPD

At Comelit-PAC, we're dedicated to leading the way in smart security solutions—developing future-ready technologies that combine performance with style.

Our CPD seminars are an extension of this commitment. Designed to support ongoing professional development, they offer valuable insight into the latest advancements in security, fire, and smart building technologies. Delivered by our knowledgeable team, each session is built to inform, inspire, and empower.

We offer flexible delivery to suit your needs:
- On-site presentations at your premises, typically during a lunchtime session (with lunch provided by Comelit-PAC)
- Live online webinars scheduled at a time convenient for your team

Whether you're a specifier, consultant, or engineer, our CPD sessions are here to support your expertise and keep you ahead of industry developments.

WHAT OUR CPD COURSES COVER

As building services technology continues to evolve rapidly, staying informed on changing standards, regulations, and product innovations is essential for maintaining professional competence.

Each of our seminars is carefully designed to deepen understanding of key considerations and legislative requirements in a specific subject area.

Our expert-led sessions cover core topics including:

- Door Entry
- Access Control
- Fire Safety Systems

VIP IP DOOR ENTRY SYSTEMS CPD: THE CONCEPTS OF IP DOOR ENTRY SYSTEMS

1 HOUR PRESENTATION

Comelit-PAC offers a clear, in-depth guide to designing IP Door Entry systems, making complex topics easy to understand.

This course takes you through a step-by-step best practice approach to specifying Door Entry—addressing common challenges, design considerations, and relevant standards such as the Equality Act.

The presentation explores both dedicated and shared IP networks, highlighting the benefits of each and how to create the most cost-effective solution for any building or development.

We'll also showcase the latest in fixed apartment monitors, from audio-only models to Wi-Fi-enabled, voice-activated options that integrate with Amazon Alexa or Google Home. The session also covers how Door Entry can be integrated with other building services, including leak detection and fire safety systems.

ACCESS CONTROL CPD:
PRINCIPLES AND FUNDAMENTALS OF DESIGNING AN ACCESS CONTROL SYSTEM

1 HOUR PRESENTATION

Comelit-PAC offers a practical introduction to designing Access Control systems, covering the essential principles and technologies involved.

This course provides a step-by-step overview of the key considerations when specifying Access Control—highlighting how these systems can enhance security, streamline building management, and add long-term value.

The presentation is ideal for consultants, architects, and specifiers, and includes guidance on system design, wiring infrastructure, and compliance with industry standards.

Topics covered include:
* The benefits of Access Control for clients and end users
* Design standards and best practices
* Typical system layouts and wiring structures
* Introduction to IP-based Access Control
* Latest Access Control credentials and technologies

FIRE SAFETY SYSTEM CPD: THE EVOLUTION OF FIRE ALARM SYSTEMS

1 HOUR PRESENTATION

Comelit-PAC presents an informative guide to the evolution of fire detection systems, exploring how far fire safety technology has come and where it's heading.

This course covers the development of fire alarm systems—from their origins to the modern-day solutions in use today. It examines the features, benefits, and limitations of current technologies, while highlighting how cloud-based software and system integration can enhance both safety and efficiency.

Ideal for consultants, specifiers, and engineers, the presentation provides valuable insight into how fire systems can work seamlessly alongside wider security infrastructure.

Topics covered include:
• The history and evolution of fire detection
• Overview of current fire alarm system types
• Features and limitations of modern fire systems
• Opportunities for system integration
• The role of cloud-based technology in fire and security

COMELIT-PAC – FEEL SECURE

Comelit-PAC is a trusted manufacturer of intelligent security systems, offering a comprehensive portfolio developed with both performance and design in mind.

Our product range includes door entry, access control, fire safety systems, video surveillance, and home automation—engineered to deliver reliable protection and seamless integration with any building specification.

All systems are designed and manufactured to the highest standards, with a focus on usability, accredited compliance, and a modern aesthetic that enhances any environment.

With a global presence and a dedicated technical and sales network, Comelit-PAC supports projects from design through to delivery, backed by ongoing innovation and expert guidance.
